

ROSARIO ALZUETA

Product Designer | UX/UI Designer | Architect

📍 Tandil, Argentina. ✉️ rosario.alzueta@gmail.com 🌐 [rosarioalzueta](#) 🌐 [rosarioalzueta.com.ar](#)

PI design complex digital products at the intersection of UX, functional definition, and development, focused on taking solutions from concept to production.
I specialize in SaaS platforms, B2B ecommerce, and fintech, working cross-functionally with product, business, and engineering teams to ensure design drives real impact.

EXPERIENCE

XCONS | *Unified Commerce Platform (B2B/B2C)*

Product Designer Dec 2024 – Present

- Led the end-to-end design of a unified commerce ecosystem for the construction industry, transforming a slow, assisted purchasing process into a fully digital flow, directly impacting quote closures and enabling product expansion into the agricultural supplies market.
- Designed the platform's core modules: real-time collaborative quoting, order management (OMS), unified user profile (CRM), and multi-variable dynamic pricing architecture.
- Continuously evolve the product by shipping new features, including self-service delivery and cancellation management for end users, and currently integrating an AI-powered conversational assistant for omnichannel sales support.
- Maintain the product design system: Figma-documented components, design tokens, and usage guidelines for the development team.
- Work with an AI-powered design workflow: generate exploratory proposals in Figma Make and Claude prior to handoff, and document each feature in a design.md file, covering interface context, functional definitions, and acceptance criteria, published as structured issues in GitLab via Open Specs.
- Lead usability testing in the development environment, execute visual and functional QA, analyze customer service reports to identify friction points, and collaborate with the Product Manager on functional product definition.

Contexto | *Cliente BBVA México*

UX/UI Designer- freelance Sep 2024 – Present

- Designed digital tools for financial education products, simplifying complex financial concepts.
- Designed investment simulators, interactive calculators, and digital publications, adapting flows and information hierarchy for different user profiles (children, teenagers, adults, and seniors).
- Collaborated with content, graphic design, and development teams to support implementation.
- Implemented the new brand visual identity across digital assets, improving consistency and accessibility.

SCI- Supply Chain Institute | *Proyecto SNAC (Sindicato Nacional Alimenticio y de Comercio México)*

UX/UI Designer Jan 2024 – Dec 2024

- Designed an end-to-end web and mobile application for union management, developed from scratch, including dashboard, agenda, workflow planning, and data input features, improving organization and internal information tracking.
- Created wireframes, UI Kit, information architecture, and animations, aligning design with technical structure to ensure scalability.
- Conducted qualitative user research to define goals and key flows, supporting strong adoption from early product versions.

Other Experiences

Architect · Project Manager · Project Lead 2016 - 2023

- As Project Manager at Intermepro, I led technical teams coordinating the planning and execution of large-scale solar energy projects.
- At the Ministry of Public Works of Argentina, I managed nationwide large-scale infrastructure projects, leading multidisciplinary teams of architects and ensuring compliance with timelines and construction quality standards.
- As Site Manager and Project Lead at Pose SA and Choix construction companies, I designed and delivered large-scale residential and public projects, coordinating interdisciplinary teams and overseeing the full project lifecycle from design through execution.

EDUCATION

Architecture	Graduated - National University of La Plata	Apr 2010 – Dec 2019
Graphic Design Fundamentals	Coderhouse	Mar 2025 – May 2025
Figma Prototyping	Coderhouse	Jul 2024 – Sep 2024
Advanced UX/UI Design	Coderhouse	Sep 2023 – Dec 2023
UX/UI Design Foundations	Coderhouse	Jul 2023 – Sep 2023

TOOLS	IDIOMAS
Design & Prototyping	Figma / Claude / Antigravity / Figma Make / Marvel
Project Management	Jira / Odoo / Notion
Research & User Testing	Maze / Optimal workshop / Deep Research
	Spanish Native
	English B1 (currently improving)
